Document No: 1082334 A and B Validation Date: 15 March 2017

Identification

Mineral Type: Natural Beryl

Color Description: Green Variety: Emerald

19-APR-17 Sale 14707 Lot 313 CHRISTIE'S

Shape: Square Carat Weight: Not Determined

Cutting Style: Emerald Cut Measurements: Approx. 6.42 x 6.38 x 3.73 mm

and 6.49 x 6.46 x 3.9 mm

Comments: Two gemstones set in a pair of white and yellow metal earrings with several

round and pear diamonds (identified at random)

Origin

Provenance: Colombia

Comments: Based on available gemological information, it is the opinion of the

Laboratory that the origin of this material would be classified as

Colombia.

Enhancement

Standard: Clarity Additional: None

Degree: Insignificant to Minor

Type: Modern

Stability Index: Very Good to Good

Comments: Emeralds are commonly clarity enhanced to reduce the visibility of fissures.

Today, modern types of materials used to clarity enhance gemstones include various polymer-type resins, singly or in combination with other types of fillers.

American Gemological Laboratories™

America's first and most highly respected origin lab.

Founded in 1977.

AGL is an internationally recognized gemstone testing facility, specializing in comprehensive colored stone analyses.

AGL has the distinction of being the first laboratory in the United States to issue Country-of-Origin reports. Our company and its principals have a long tradition of research into the detection of and reporting on gem identificationand-classification, gemstone treatments and provenance determinations.

Our staff is composed of experts in the field of gemstone testing and reporting. Our findings reflect the latest knowledge and analytical techniques to ensure the highest standards are applied on every stone we test.

AGL's testing and reporting methodology provide you with unsurpassed quality and reliability. We are committed to providing the highest level of service and reporting that our clients and the industry have come to expect from the AGL.
